Team ID	Individual
Project Name	Incident Lifecycle Automation in ServiceNow
Maximum Marks	2 Marks

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	A Service Desk agent in an organization, responsible for handling and tracking IT incidents.
I'm trying to	<i>List their outcome or "job" the care about - what are they trying to achieve?</i>	Create, classify, assign, and track incidents efficiently until resolution.
but	<i>Describe what problems or barriers stand in the way - what bothers them most?</i>	Incidents can be difficult to classify correctly and may be assigned to the wrong support team.
because	<i>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</i>	Incident information may be incomplete or handled through informal communication channels, making the process less structured.
which makes me feel	<i>Describe the emotions from the customer's point of view - how does it impact them emotionally?</i>	Frustrated when incidents are delayed, reassigned repeatedly, or difficult to track.

Problem Statements – PS-1 and PS-2

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Service Desk Agent)	A Service Desk agent responsible for handling and tracking IT incidents.	Create, classify, assign, and track incidents efficiently until resolution.	Incidents can be difficult to classify correctly and may be assigned to the wrong support team.	Incident information may be incomplete or handled through informal communication channels.	Frustrated when incidents are delayed, reassigned repeatedly, or difficult to track.
PS-2 (IT Support Technician)	An IT support technician responsible for investigating and resolving incidents.	Diagnose incidents quickly and use relevant knowledge and support information to resolve them.	Finding relevant troubleshooting information and coordinating related changes can take time.	Incident, Knowledge, Change, and SLA information may not be connected in one structured process.	Concerned about delayed resolution, SLA impact, and recurring incidents.
