**User persona:** Service Desk Agent handling IT incidents. The entries below follow the six sections shown in the template: Think & Feel, Hear, See, Say & Do, Pain, and Gain.

|                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>THINK &amp; FEEL</b> <ul style="list-style-type: none"> <li>• Wants incidents to be resolved quickly and correctly.</li> <li>• Worries about SLA breaches and delayed resolution.</li> <li>• Wants clear ownership and visibility of incident progress.</li> <li>• Values easy access to troubleshooting knowledge.</li> </ul>                  | <b>HEAR</b> <ul style="list-style-type: none"> <li>• Users report connectivity and access problems.</li> <li>• Support teams provide troubleshooting instructions and status updates.</li> <li>• Managers emphasize timely resolution and SLA compliance.</li> <li>• Colleagues recommend using existing Knowledge articles.</li> </ul>                                |
| <b>SEE</b> <ul style="list-style-type: none"> <li>• Multiple incident records with different categories and priorities.</li> <li>• Assignment groups such as Service Desk and Network.</li> <li>• Knowledge articles related to reported issues.</li> <li>• SLA information and related records in the incident workspace.</li> </ul>              | <b>SAY &amp; DO</b> <ul style="list-style-type: none"> <li>• Creates and classifies incidents.</li> <li>• Assigns incidents to the appropriate support group.</li> <li>• Uses Agent Assist and attaches relevant Knowledge articles.</li> <li>• Adds work notes and monitors incident progress.</li> <li>• Communicates updates to users and support teams.</li> </ul> |
| <b>PAIN</b> <ul style="list-style-type: none"> <li>• Incorrect classification or assignment can delay resolution.</li> <li>• Searching for relevant troubleshooting information can take time.</li> <li>• Repeated reassignment can make ownership unclear.</li> <li>• SLA breaches and recurring incidents create additional pressure.</li> </ul> | <b>GAIN</b> <ul style="list-style-type: none"> <li>• Faster and more structured incident resolution.</li> <li>• Clear assignment and ownership throughout the lifecycle.</li> <li>• Quick access to relevant Knowledge articles.</li> <li>• Better SLA visibility and tracking.</li> <li>• Reusable knowledge from resolved incidents.</li> </ul>                      |

### Empathy Insight:

The Service Desk Agent needs a structured incident workflow that combines classification, assignment, Knowledge assistance, SLA tracking, escalation, and resolution information in one process.
